

## Deerfield Village Property Owners' Association, Inc

### Solar Panel Guidelines

The Deerfield Village Covenants and By-Laws require residents to complete an approval form for Streets and Grounds/Architectural Review Committee prior to the erection of any solar panels on their property. (Form can be found on the website)

The guidelines are as follows:

1. All installation must be done by a licensed solar contractor.
2. Panels are to be placed only on the roof and must be flat against said roof.
3. Electrical conduit must be run on the interior of the house. Any exposed conduit or equipment must be kept to a minimum and located close to the existing electric meter.
4. Any conduit and equipment exposed on the outside of the house must be painted to match background. (shingle color, siding color, etc.)
5. All requests must be approved prior to any work being performed.
6. Regular maintenance of the solar panels and equipment is required.
